BOLTON HOSPICE STRUCTURE

Supporting Team:

Chairman of the Trustees: Judith Bromley

Chief Executive: Leigh Vallance

Clinical Nurse Director: Jill Entwistle

Bolton Hospice is a forward thinking independent hospice supported largely by its own sustainable charity income as well as CCG Bolton. It has a determination to ensure that everyone in our diverse community has equal access to excellent specialist palliative and end of life care and plays a leading role as a hub of specialist knowledge, training education and community awareness.

It opened in 1992 (a purpose built building) and offers 18 inpatient beds, Day Therapy (14 places Tuesday to Friday), outpatient clinics (three per week) and a Hospice at Home nursing service.

There has recently been a major building project, which has improved facilities for patients, increased bed capacity to 18 and allowed the development of a Cancer Information Centre in collaboration with Macmillan.

There is a full multi-disciplinary team which as well as nursing and medical staff, includes a physiotherapy and occupational therapy team (employed by Bolton NHS FT), social workers (employed by the local authority), complementary and creative therapists and chaplain.

The hospice works closely with the Specialist Palliative Care team, providing an integrated service to patients. It benefits from good working relationships with a clinical psychologists and pain anaesthetist and has a developing education department with strong links to Bolton University.

This post encompasses the Medical Director role, however this depends upon the skills and experience of the doctor appointed. Support and mentorship will be provided.

The Hospice Medical Team includes:

- Access to Hospital Consultants
- 4 Specialty Doctors (two full time, two part time)
- Three GP trainee posts (one full time, two part time)
- Specialists Trainees

The hospice participates in Specialist Medical training as part of the NW regional training scheme for palliative medicine, the post holder will have the opportunity to be a clinical supervisor and contribute to the Specialist Training Committee. (Not currently part of NW regional training scheme).

Placements are offered to final year medical students from Manchester in collaboration with a local general practice.

OUR MISSION is to provide the very best specialist palliative and end of life hospice care for the people of Bolton.

OUR VISION is for everyone in our diverse community to have equal access to excellent specialist palliative and end of life care.

OUR PURPOSE is to enable people with life-limiting illnesses to live well until they die and achieve a good death, by providing compassionate care and support for patients and their families.

DEFINITIONS

Palliative Care is an approach that improves the quality of life of patients and their families facing the problems associated with life-threatening illness, through the prevention and relief of suffering by means of early identification, impeccable assessment, treatment of pain and other problems; physical, psychosocial and spiritual.

Palliative Care:

- provides relief from pain and other distressing symptoms
- affirms life and regards dying as a normal process
- intends neither to hasten nor postpone death
- integrates the psychological and spiritual aspects of patient care
- offers a support system to help patients live as actively as possible until death
- offers a support system to help the family cope during the patient's illness and in their own bereavement
- uses a team approach to address the needs of patients and their families, including bereavement counselling, if indicated
- will enhance quality of life and may, also, positively influence the course of illness
- is applicable early in the course of illness, in conjunction with other therapies that are intended to prolong life, such as chemotherapy or radiation therapy, and includes those investigations needed to better understand and manage distressing clinical complications."

End of Life Care focuses on the final twelve months of life for people with cancer as well as non-malignant disease.
