Somatostatin Analogues Compared With Placebo and Other Pharmacologic Agents in the Management of Symptoms of Inoperable Malignant Bowel Obstruction: A Systematic Review

George P. Obita, MB, ChB, MPHCM, MSc, MFPH¹, Elaine G. Boland, MD, MRCP, PhD, David C. Currow, BMed, MPH, PhD, FRACP, FAHMS, Miriam J. Johnson, MBChB (Hons), FRCP, MD, Jason W. Boland, MB, BChir, FRCP, PhD

JPSM – Journal of Pain and Symptom Management

There has been a lot of debate about the use of these drugs recently. This is a great starting point for those interested. The implications for future research section is worth reading for anyone who is thinking about doing any further work in the area.
