## COVID-19 Family Impact

COVID-19 can have a huge impact on people's lives, as well as on their partners and family members.

We want to find out in more detail how COVID-19 affects the quality of life of the affected person and their partner or family members.

If you or your family have been infected with COVID-19, then your help with this survey would be greatly appreciated. Your contribution will help us better understand this pandemic and its impact on society.

Please note: this survey is only for families where the person with COVID-19 has survived.

Thank you for your time! We would be grateful if you could kindly forward this to anyone you know.
