iOS Devices – iPad, iPhone, iPod Touch

1. On any message, tap the sender and add to either a new contact or an existing contact:

Android Devices – Samsung, Google Nexus, others

1. In the default email client, touch the picture of the sender.
2. Click OK to add to contacts.

An unavoidable side effect of additional filtering may be a slight increase in the number of incorrectly classified legitimate emails (false positives) being tagged as spam in the same manner. We would always advise members to periodically review the contents of the Spam folder and use the "Accept to Inbox" function to white-list individual email addresses or complete domains as appropriate for emails that you are 100% sure are legitimate.

Occasionally, particularly in the case of bulk mails where the sender may use tracking identifiers as part of the address, white-listing may not be completely successful. If you encounter problems in this respect please contact the Member Services team by email help@doctors.org.uk or call the team on 01235 828400.
